

TOWARDS ONE HEALTH
SUSTAINABILITY

Product Catalogue

Chimertech delivers precision-driven veterinary, breeding, and dairy health solutions engineered for measurable herd performance. Built to improve fertility, reduce losses, and support farm profitability.

Chimertech Private Limited was established as an effort to deliver leading-edge and cutting-edge technologies to the general public and working professionals with minimal effort and end-user-friendly technologies, that caters to the farmers. Chimertech is a growing enterprise with 6 years of operational experience, although established by people with over 40 years of experience within the pharma, IVD and veterinary sector.

Chimertech Private Limited focuses on scientific and technological concepts to create sustainable and eco-friendly practices in the field of animal husbandry, veterinary science, bio-electronics, biotechnology, and healthcare. Chimertech Private Limited is keen on developing rapid, point-of-care, and non-invasive theranostic technologies catering to the needs of healthcare providers and farmers with precision and cost-efficiency as prime objectives.

Our Vision

To be the most farmer-centric company and to create eco-friendly, sustainable and tech-driven agricultural practices thereby establishing One Health sustainability.

Our Mission

Create groundbreaking One Health sustainability innovations and make a positive impact for the marginalized and working-class communities at an affordable price.

QUADMASTEST DETECTION

Quadmastest is a reagent free mastitis detection device that can early detect sub-clinical mastitis at individual teat in any dairy cow irrespective of the nature of the breed. During In mastitis, the mineral and ionic composition of milk is modified and this especially concerns the concentrations of potassium, sodium, and chloride ions which are strongly increased.

BENEFITS

Detects sub-clinical mastitis at a very early stage (SCC of 200,000 cells/mL)

No reagent consumable required for routine testing.

Prevents milk production loss by 50% to 80%.

Battery-operated with 8 hours of backup.

RFID - based animal identification and traceable data collection.

Provides immediate results within 10 seconds with 98.4% accuracy.

One-time investment that lasts for years.

Available SKU:

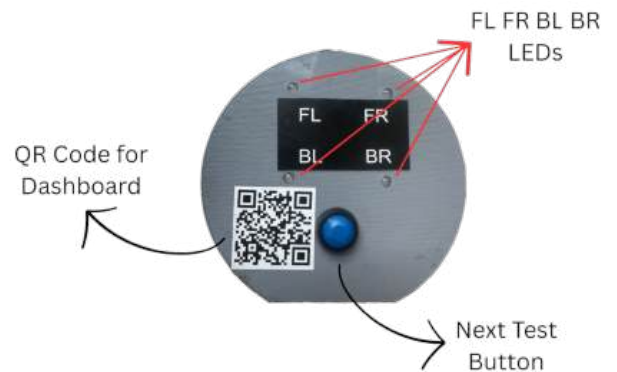

Quadmastest Kit

Quadmastest Kit with Portable printer

INLINE QUADMATEST EARLY DETECTION

Inline QMT enables quarter-wise mastitis analysis in real-time during milking, with Wi-Fi dashboard access, LED alerts, data logging, and OTA updates with minimal manual milk handling after installation.

- **Real-time Mastitis Detection**
Provides instant, reagent-free results during milking.
- **Inline Integration**
Fits seamlessly with existing milking systems without disrupting workflow.
- **Quadrant-Specific Analysis**
Detects mastitis individually in all four quarters of the udder.

- **High Accuracy & Reliability**
Uses advanced EC-based algorithms with temperature compensation.
- **Farmer-Friendly Dashboard**
Simple LED indicators + web portal access for results & reports.
- **Cost-Effective & Scalable**
Reduces antibiotic misuse, milk losses, and improves herd health.

CALIFORNIA MASTITIS TEST KIT **DETECTION**

California Mastitis Test Kit is a simple, cost-effective paddle-based test for early detection of mastitis in dairy animals. It works by mixing a reagent with milk to identify high somatic cell counts (SCC), a key indicator of udder infection. This action forms a gel-like consistency in the presence of elevated SCC, making results easy to interpret at the point of care. Ideal for quarter-wise screening, California Mastitis Test Kit helps detect subclinical and clinical mastitis before major milk loss occurs. It supports timely treatment decisions, improves udder health and herd health management, and prevents milk contamination. Portable, easy to use, and perfect for daily on-farm monitoring without the need for equipment.

Available SKUs:

500mL, 5L, 20L and 35L

500mL, 5L, 20L and 35L with paddle

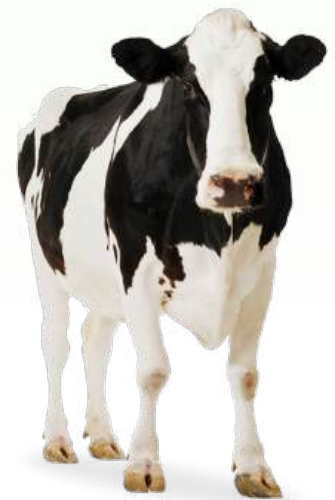

- 1 Quick and easy identification of mastitis in cows.
- 2 Reliable field test for easy detection of subclinical mastitis on the farm.
- 3 Simple procedure with easy to interpret results.
- 4 Supports timely intervention and helps identify subclinical cases before symptoms appear
- 5 Trusted by veterinarians and dairy farmers around the world for over 50 years.

FINE KINE PREVENTION

Fine Kine is an easy-to-use, external teat sealant specially formulated to act as a protective physical and microbial barrier on the teat canal of dairy animals. Designed for use during dry period and high-risk stages, Fine Kine helps prevent environmental pathogen entry, reducing the chances of mastitis and supporting udder health without antibiotics.

- 1 Lactic acid-based post-milking dip external teat sealant for a natural and gentle barrier against mastitis.
- 2 Offers up to 30 hours of protection.
- 3 Ideal for farms that prefer Eco-friendly, biodegradable solutions with minimal residue in milk.
- 4 Gentle on the skin, making it suitable for farms focused on animal welfare and natural products.

Available SKUs:

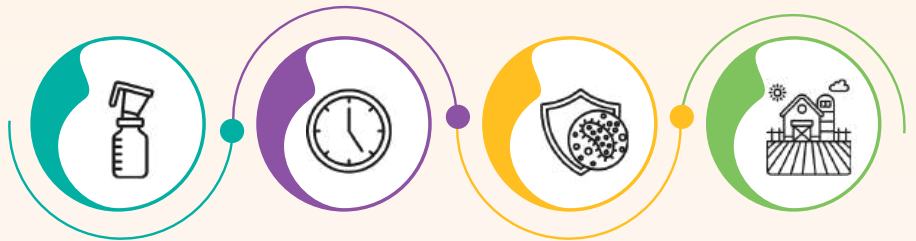

1L, 5L, 20L and 35L

1L, 5L, 20L and 35L with Dipcup

IOGIENE PREVENTION

Iogiene is an effective iodine-based antiseptic teat dip for mastitis prevention. Provides strong antimicrobial action while being gentle on the teat skin. Suitable for both pre- and post-milking teat disinfection. Helps minimize cross-contamination between cows during milking. Promotes healthy teat condition and reduces pathogen load on the udder.

- 1 Iodine-based post-dip external teat sealant with strong antimicrobial action to kill pathogens.
- 2 Provides 16 hours of protection.
- 3 Ideal for farms requiring maximum disinfection during high pathogen loads or outbreaks.
- 4 **Unique Advantage:** Highly effective for large-scale or high-risk operations that need robust pathogen control.

Available SKUs:

1L, 5L, 20L and 35L

1L, 5L, 20L and 35L with Dipcup

MOO-FOAM

PREVENTION

Moo-Foam is Chimertech's innovative foam-based udder hygiene solution designed to gently clean and disinfect the teats before milking. Its rich, stable foam ensures effective dirt removal while being soft on the animal's skin, promoting healthier teats and reducing the risk of mastitis.

1 Foam-based pre and post-dip with a foaming surfactant system for effective cleaning.

2 Provides 8 hours of protection, suitable for shorter intervals between milking.

3 Ideal for farms needing an all-in-one cleaning and sealing solution for pre and post-milking hygiene.

4 An economical and time-efficient solution for farms with moderate pathogen concerns.

Available SKUs:

1L, 5L, 20L and 35L

1L, 5L, 20L and 35L with Dipcup

H-UDDERON HERBAL TEAT SPRAY

H-UDDERON (PREVENTION)

H-Udderon is a ready-to-use herbal udder spray that protects dairy cattle from mastitis and maintains proper udder hygiene. It acts as a protective shield after milking, helping prevent infections and support healthy milk production. It is especially effective against subclinical mastitis, reducing milk loss and minimizing antibiotic use.

1

Lactic Acid-Based Formula

Kills harmful microbes and forms a protective layer on the teat after milking.

2

Neem & Turmeric

Provides natural antibacterial and soothing benefits.

3

Reduces Microbial Load

Helps prevent infections and cross-contamination.

4

Safe for Daily Use

Gentle, ready-to-use and ideal for regular dairy management.

Available SKUs:

Available on: 500mL, 1L (Teat Spray)

MASTOVEDA **TREATMENT**

MastoVeda is a scientifically formulated herbal solution designed to support subclinical mastitis treatment and faster udder recovery. It combines potent anti-inflammatory and antimicrobial herbal actives that help reduce swelling, pain, and infection naturally. Safe for subclinical mastitis cases, reducing the need for aggressive antibiotics. Promotes quicker healing and restores milk production without harmful residues. Easy-to-administer formulation, suitable for topical application as part of standard veterinary care. Supports udder tissue regeneration, enhances immunity, and ensures better long-term herd health.

- 1 A poly herbal ethno-veterinary formulation, utilizing natural herbal ingredients to treat sub-clinical mastitis.
- 2 Targets inflammation, enhances udder health, and promotes natural immune response for effective healing without synthetic chemicals.
- 3 Ideal for farms focused on herbal-based mastitis solutions.
- 4 Completely natural and eco-friendly, it reduces the risk of milk contamination and antibiotic resistance, making it ideal for organic dairy farms.

Available SKUs:

200mL, 1L, 5L, 20L and 35L

200mL, 1L, 5L, 20L and 35L with Spray pump

TIC-TICK-TIC

TOPICAL APPLICATION

Tic-tick-tic is a powerful, plant-based formulation designed for effective tick and ectoparasite control in cattle. Kills ticks and prevents re-infestation without harmful chemicals, ensuring animal safety. Helps reduce the risk of tick-borne diseases such as *babesiosis* and *anaplasmosis*. Easy-to-use topical application, suitable for regular preventive care and treatment. Supports healthier skin, promotes animal comfort, and improves overall productivity.

1

A poly herbal formulation designed for the treatment of tick infestations, utilizing natural herbal ingredients.

2

Mechanism of Action: Effectively repels and eliminates ticks, while soothing skin irritation caused by tick bites.

3

Applied externally on animals as part of the tick management routine to reduce tick load and prevent re-infestation.

4

Eco-friendly and residue-free, making it safe for milk-producing animals and ensuring no contamination in milk or meat products.

Available SKUs:

200mL, 1L, 5L, 20L and 35L

200mL, 1L, 5L, 20L and 35L with Spray pump

FEED SUPPLEMENTS

Nutrakine

NUTRAKINE MINERAL MAX

FEED SUPPLEMENTS

Nutrakine Mineral Max is a premium mineral mixture specially formulated for cattle and livestock health. It helps improve milk production, supports healthy growth, and maintains overall animal performance. Enriched with essential minerals and vitamins, it enhances immunity, fertility, and bone strength. Regular use helps prevent mineral deficiency and improves feed efficiency.

FEATURES:

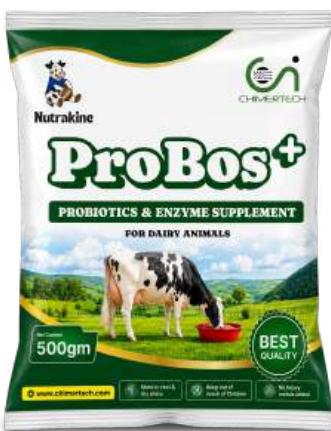

- Improves Milk Yield & Quality
- Supports Healthy Growth & Weight Gain
- Enhances Immunity & Fertility
- Strengthens Bones & Overall Health

Available SKUs: 1 kg, 25 kg

NUTRAKINE PROBOS+

FEED SUPPLEMENTS

ProBos+ is an advanced probiotic feed supplement designed to support healthy digestion and improve feed efficiency in cattle and livestock. It contains beneficial probiotics, enzymes, and active ingredients that help maintain gut health, enhance nutrient absorption, and support better growth and productivity. Regular use helps improve animal performance and overall wellness.

FEATURES:

- Improves Digestion
- Supports Gut Health
- Better Feed Efficiency
- Enhances Growth & Immunity

Available SKUs: 500 g, 25 kg

On Field Rapid Testing Kits

Empower your herd management with Chimertech's advanced diagnostic suite. A wide range of rapid diagnostic kits provides livestock owners and veterinarians with precision point-of-care tools for the field-based screening of critical infectious diseases. From identifying pregnancy as early as 28 days to rapid screening, these kits facilitate immediate, data-driven decisions that improve herd productivity and biosecurity by identifying **critical pathogens and biomarkers**

Anthrax Antibody Rapid Test Kit

- Fast on-site detection of anthrax antibodies in cattle.
- Supports early screening and herd-level disease surveillance and reduces mortality risks.
- Quick, easy-to-use strip format – no lab setup required.
- Early intervention ensures herd safety and farmer profit.

Bovine Leptospirosis Antibody Rapid Test Kit

- Detects Leptospirosis, a major cause of abortion and infertility.
- Early diagnosis reduces spread and supports timely treatment.
- Field-friendly kit with quick results.
- Supports better herd health planning.

Bovine Tuberculosis Antibody Rapid Test Kit

- Rapid screening of TB in cattle herds to avoid disease spread.
- Helps meet biosecurity norms and ensures healthier livestock.
- Simple procedure with easy result interpretation.
- Reduces economic loss due to TB-related issues.

Brucella Antibody Rapid Test Kit

- Detects brucellosis, a key cause of abortion and infertility in cattle.
- Quick on-farm testing for early disease identification.
- Supports screening and control decisions to reduce public health risk.
- Enables timely vaccination and control measures.

Foot and Mouth Disease DIVA Antibody Rapid Test Kit

- Differentiates infected from vaccinated animals (DIVA principle).
- Supports smart vaccination programs and monitoring.
- Aids in FMD eradication and control strategies.
- Fast, reliable on-site diagnosis.

Foot and Mouth Disease Antibody Rapid Test Kit

- Detects FMD antibodies, ensuring early detection and management.
- Supports disease surveillance programs.
- Helps reduce economic losses from FMD outbreaks.

Theileria Ta/To Antibody Rapid Test Kit

- Rapid detection of *Theileria annulata* and *T. orientalis* infection.
- Supports early detection and timely veterinary action.
- Quick, field-deployable diagnosis for effective control.
- Reduces animal stress and supports timely treatment.

Hemorrhagic Septicemia Antibody Rapid Test Kit

- Early detection of *Pasteurella multocida* infection.
- Reduces sudden death risk during outbreaks.
- Simple field-testing method, quick interpretation.
- Supports timely veterinary treatment and vaccination planning.

IBR Antibody Rapid Test Kit

- Detects Infectious Bovine Rhinotracheitis (IBR) Antibody.
- Helps control respiratory disease outbreaks in dairy herds.
- Quick test procedure, suitable for field conditions.
- Supports vaccination planning and herd health decisions.

Listeria Antibody Rapid Test Kit

- Screens for *Listeria* infections, preventing reproductive losses.
- Protects both animal and public health (zoonotic concern).
- Easy-to-use on-farm solution for early diagnosis.
- Supports better disease management planning.

Salmonella Antibody Rapid Test Kit

- Early detection of Salmonella infections in cattle.
- Prevents digestive disturbances and milk contamination.
- Simple strip-based test with quick results.
- Helps safeguard animal health and consumer safety.

Scrub Typhus Antibody Rapid Test Kit

- Detects scrub typhus infection, often overlooked in livestock.
- Supports faster treatment decisions and reduces losses.
- Simple kit format for easy testing on the farm.
- Ensures early intervention and recovery.

NSURETM LACTO

- Instant test strips to detect 12 key milk adulteration and quality parameters, including Detergent, Salicylic Acid, Hydrogen Peroxide, Salt, Urea, Sucrose, Boric Acid, Neutralizers, Maltodextrin, Glucose, Starch, and Freshness.
- Provides rapid and reliable screening for milk quality assessment.
- Simple dip-and-read format – no training required.
- Helps ensure milk safety, quality, and consumer confidence.

PregKine (Bovine Pregnancy Kit)

Maximize your farm's reproductive efficiency with the Chimertech's PregKine Rapid Test Kit, designed for early pregnancy detection in cattle. This advanced diagnostic tool identifies **pregnancy-associated glycoproteins (PAGs) with based on validation data** as early as 28 days post-breeding. Delivering visual results in just 15 minutes, it enables immediate decision-making for re-breeding and herd management. The process is minimally invasive, requiring only a small blood sample and no specialized equipment.

- 1 Advanced, rapid pregnancy detection kit for cattle, designed to identify pregnancy-associated biomarkers directly from a small blood sample
 - 2 A minimally invasive, quick, and reliable.
 - 3 Use 2-4 drops of whole blood/serum/plasma as per kit instructions.
 - 4 Detects pregnancy as early as 28 days post-breeding.
 - 5 Generates the result in as fast as 15 minutes.
- Available SKU: 1 Test, 20 Test, 100 Test

BREEDING & AI ESSENTIALS

Elevate your breeding success with Chimertech's end-to-end Breeding and AI professional suite. Our range integrates precision Digital AI Guns for visual semen deposition, Handheld Estrus Detectors for pinpointing peak fertility, and high-performance LN₂ Storage Containers and Thawing Units to maintain genetic viability. Together, these tools eliminate guesswork, optimize calving intervals, and maximize the genetic potential of your herd through data-driven artificial insemination

ESTRUS GUN (CATTLE)

- Helps identify heat cycles for timely insemination in cattle, improving fertility and reducing missed breeding opportunities.
- Reduces repeat breeding problems.
- Simple and reliable tool for farmers and technicians.
- Improves reproductive efficiency and calving rates.

ESTRUS GUN (GOAT / SHEEP)

- Specially designed estrus detection tool for small ruminants like goats and sheep, ensuring better breeding efficiency.
- Assists in improving breeding success in goats and sheep.
- Easy handling and accurate detection.
- Supports faster herd expansion.

PORTABLE LIQUID NITROGEN CONTAINER [SEMEN STORAGE]

- Ideal for farms, AI technicians, veterinarians field use
- Lightweight and rugged – built to handle tough field conditions.
- Vacuum-insulated for minimal LN2 loss and long holding time.
- Maintains consistent cold temperature to protect semen viability.

SEMEN THAWER

- Efficient thawing system for frozen semen straws
- Ensures viability and success of artificial insemination procedures
- Maintains the ideal temperature for semen thawing.
- Accurate temperature control with easy operation.

ARTIFICIAL INSEMINATION AI GUN

- Precision-designed Artificial Insemination AI Gun for easy and effective breeding of dairy cattle, ensuring higher conception success rates.
- Durable and easy-to-use tool and ensures accurate semen deposition for higher conception rates.
- Ergonomically designed for comfortable handling.
- Supports better breeding outcomes and farm productivity.

Milk Replacer for Calves, Kid Goats, and Lambs

1

Easy to Consume

Specially formulated for high palatability for young animals readily accept it and receive proper early nutrition.

2

Supports Digestive Safety

Supports digestive safety by promoting healthy gut function and better nutrient absorption during the early growth stage.

3

Encourages Optimal Growth

Provides balanced nutrition for steady weight gain and strong body development.

4

Smooth Weaning Support

Helps young animals transition easily from milk to solid feed without stress.

5

Improves Overall Health

Strengthens immunity and supports better performance in growing calves, kid goats, and lambs.

Available on: 10 kg, 25 kg

FIELD POINT OF CARE PRODUCTS

Point-Of-Care

Gas Meter

- Essential for detecting harmful gases like ammonia and methane in animal housing
- Improves ventilation, herd safety and prevents toxic gas buildup
- Compact, easy-to-use, with real-time display
- Supports farm safety compliance

Air Quality Meter

- Handy device to measure air quality inside cattle sheds
- Helps monitor air quality to support a healthier shed environment. A healthy environment for animals.
- Alerts farmers on ammonia, methane, and other gas build-ups
- Supports better ventilation management for animal comfort
- Reduces respiratory diseases and improves animal welfare

nSure Aqua

- Instant test strips to monitor key water quality parameters.
- Checks pH, hardness, and nitrates, ensuring clean drinking water for livestock.
- Simple dip-and-read format – no training needed.
- Prevents water-related health problems and improves productivity.

RUBBER MAT FOR COWS

- Premium cow mat for comfort and Durability for enhanced cattle health and productivity
- Easy to clean and maintain with thermal insulation
- Designed with non-slip surface for safety
- Cost effective for heavy use.
- Comfortable, prevents injuries, Increases milk yield, Improves Hygiene and provides Thermal Insulation

COW LIFTING MACHINE

- Heavy-duty, high-quality and durable supporting cows of varying sizes and weights
- Ensures safety and stability during lifting for recovery or transportation
- Helps in managing weak and temporarily immobile cows
- Requires minimal effort, operable by a single person
- Suited for outdoor use and for harsh environments with anti-corrosive finish

RFID Reader & Tags

- Easy livestock identification and tracking solution with RFID technology for better herd management, record keeping, and traceability.
- Supports tracking of health, breeding, and vaccination history.
- Durable tags with tamper-proof design.
- Portable RFID reader with simple operation.

Milking Machine

- Compact, Portable, plug-and-milk solution for farms
- Faster milking with minimum effort
- Gentle milking, better udder health, and cleaner milk, easy to move between animals and sheds
- Quick-wash hygiene and low maintenance
- Made of stainless steel - Efficient, Reliable and Durable

Available SKUs: 25L Monoblock pump, 25L belt-driven pump

Cream Separator

- Separates cream from milk, yields high quality cream
- Consumes low power and cost effective
- Efficient for producing cream cheese, butter etc.,
- Operates with minimal technical knowledge
- Easy to assemble, disassemble and clean
- Easy to sanitize and reduces the risk of contamination
- Eco - friendly and cost - effective

Available SKUs: Electric and manual

Chaff Cutter

- Robust, efficient and meticulous micro feed processor
- Efficient for small-scale dairy farms
- Adjustable cutting size according to the animal's preference and nutritional need
- Processes both green feed and dry feed
- User friendly design reducing manual effort

Available SKUs: Vertical, Horizontal and High capacity

All Dairy Accessories

Heavy Duty Calf Milk Feeding Bottle

1L Calf Milk Feeding Bottle

3 in 1 TDS, PH, Temperature Meter

Calf milk feeding bottle rubber nipple

Stainless Steel Water Bowl

Water Bowl Dispenser for Cow

CSM Fully Automatic Cow Water Bowl

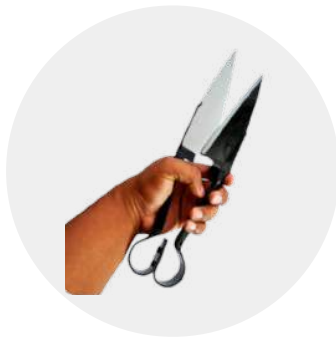

Hoof Knife for Cow, Horse and Goat

Chimertech Private Limited offers a wide range of dairy accessories designed to improve animal health, farm hygiene, and dairy productivity. Our portfolio includes Milking Machines, Cream Separators, Chaff Cutters, RFID Tags, Cow Lifting Machines, and other essential dairy farm solutions.

**Professional Cow Hoof
Cutter**

**Professional Hair
Clipper**

**Animal Lick Mineral Block
for Cow, goat, and sheep**

**Ear Tag Animal Plier
Forcep Applicator**

**Livestock Ear Tag 100
(Green)**

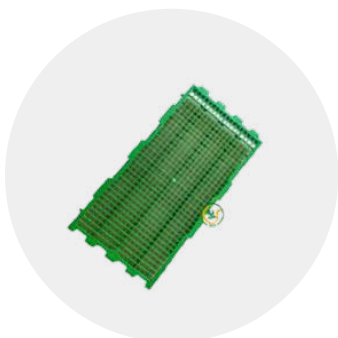

**Oral Drenching
Pipe**

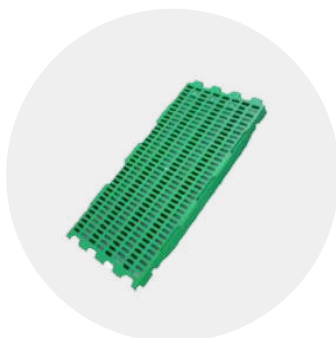

**Digital Veterinary
Thermometer**

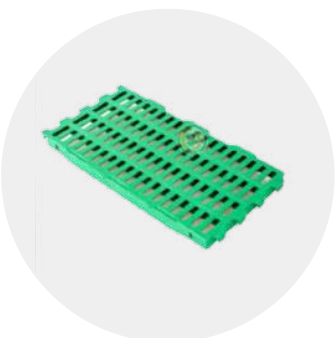

**D-Horn (Dehorning
Paste)**

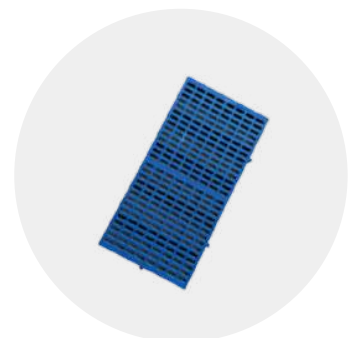

Poultry Cage Plastic

**Plastic Slatted Floor Mat
for Dogs and Farm
Animals**

Goat and Dog Cage

Plastic Slatted Cage

All Poultry Accessories

Chimertech extends its precision engineering to the poultry sector, offering a specialized range of automatic watering systems and diagnostic tools to enhance flock productivity. Our catalogue includes automatic chicken float cups for consistent hydration and essential health management aids like digital thermometers and disease screening kits.

Infrared heat lamp bulb

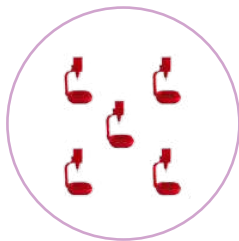

Adjustable and continuous syringe gun

Agarwals feeding needle and syringe kit

Dental irrigation syringes with a curved tip

5-Pack All Direction Poultry Nipple Drinker with Drip Cup

Plastic chick feeder

Plastic chick drinker

Automatic chicken water cups.

Portable LED egg candler tester

Hog ring plier kit

Turbo chick feeder

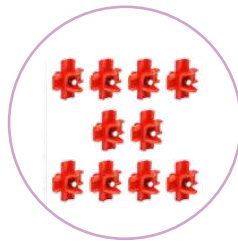

Pinless chicken peepers

Automatic chicken waterer cups

CSM Automatic Poultry Drinking Cups

Horizontal side-mount automatic poultry watering nipples

Automatic screw-style poultry chicken water nipple drinkers

Automatic float cup drinker for poultry

DIY gravity chicken feeder kit

Pashu Partner

Pashu Partner is Chimertech's specialized on-field veterinary support network, delivering field veterinary support services through trained personnel and veterinary partners, and rapid diagnostics directly to your doorstep. This service bridges the gap for rural dairy farmers by providing a fleet of trained Pashu Partners equipped with mobile units to perform on-site checkups and treatments

-  Disease Diagnostics
-  Reproductive Health
-  Milk Quality Testing
-  Parasitology Screening
-  Cattle Loans & Insurance
-  Nutrition & Feed Management
-  Preventive & Vaccination Services
-  Consultancy and Advisory Services
-  Animal Welfare and Stress Monitoring
-  Periodic Animal Health Checkups
-  Biosecurity and Zoonotic Disease Control

What is PashuCentral?

PashuCentral is India's first dedicated Dairy Health & Diagnostics Franchise Network.

Telemedicine support

95+ veterinary Products

24/7 Vet Support

Artificial insemination Support

Mastitis Management

Cattle Marketplace

80,000+
CATTLE

15+
STATES

11,000+
FARMERS

- ▶ PashuCentral integrates veterinary care, diagnostics, AI support, and farm-level services under one system.
- ▶ Cattle health, milk quality, and productivity are managed through standardized protocols.
- ▶ From preventive care to advanced interventions, services are available round the clock.
- ▶ PashuCentral functions as the control layer for India's dairy health economy.

"Building the Control Layer for India's Dairy Health Economy"

CATTLE INSURANCE

Your cattle are not just animals – they are your daily income, long-term asset, and livelihood.

Cattle Insurance ensures financial protection against unexpected loss due to disease, accident, or natural calamities.

WHAT IS COVERED

This policy covers all major categories of cattle, whether indigenous, cross-bred, or exotic:

- Milch Cows & Buffaloes
- Calves & Heifers
- Stud Bulls
- Bullocks (Castrated Bulls) & Castrated Male Buffaloes

CATTLE LOAN

A good cow or buffalo is not an expense – it is a daily income generating asset.

Cattle Loan enables dairy farmers to purchase high-yield animals, expand herd size, and grow milk income without heavy upfront capital.

WHAT THE LOAN SUPPORTS

Cattle loans are available for:

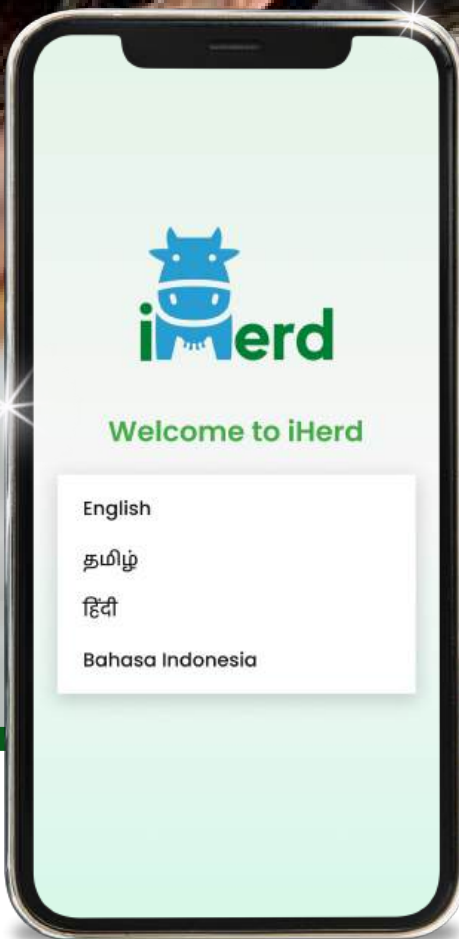

- Milch Cows & Buffaloes
- Heifers (Future Milk Animals)
- Herd Expansion & Dairy Growth
- Replacement of Low-Yield Animals

Protect Your Livestock. Secure Your Income.
Own Better Cattle. Earn Better Every Day.
